Fruit Salad Logic Puzzle

This morning, five of the Super Crew members made a fruit salad to share for breakfast. There were two girls (Abigail and Jessie) and three boys (Marcus, Andy, and Tom-Tom). They each prepared and put in one of their favorite fruits (kiwi, pineapple, blueberries, mango, and watermelon). Use the website and the following clues to figure out what order the Super Crew members put their fruit into the fruit salad!

1. The first member to put their fruit in the salad had to cut off the hard outside and take out all of the big black seeds.
2. Abigail put her fruit in third, then the pineapple went in the fruit salad.
3. The last Super Crew member to put their fruit in had to cut off the outer skin, then cut up the bright orange fruit.
